Annotation. This article explores the use of educational technologies in teaching ethnopedagogical examples in primary school, using the reading subject as a case study. It examines how innovative teaching methods and technologies can enhance the quality of education and increase students' interest in learning by integrating national values and cultural heritage.

Keywords. Educational technologies, ethnopedagogy, reading subject, proverbs, sayings.

When considering the example of second-grade students, integrating ethnopedagogical elements into the teaching process of the "Reading" subject plays an effective role in fostering a spirit of love and respect toward national and ethnic culture, traditions, and values. Utilizing ethnopedagogical methods in teaching historical topics such as "Our Ancestors" included in the second-grade reading curriculum is of great importance in shaping students' national identity.

Teaching students about Uzbekistan's rich historical heritage and the achievements of their ancestors not only enhances their knowledge but also instills patriotic feelings. Especially for second-grade students, the use of modern educational technologies allows for the presentation of topics in a more engaging and memorable way.

This article discusses how to apply elements of ethnopedagogy and modern educational technologies in the lesson on the topic "Our Ancestors." This topic provides students with a unique opportunity to learn about their history, culture, and the noble qualities of their ancestors. Through this theme, students are introduced to national values, customs, and the significant historical roles of their ancestors.

From the standpoint of ethnopedagogy, this topic encourages students to understand their national identity and nurtures a respectful attitude toward their homeland. The use of multimedia technologies in teaching the topic "Our Ancestors" makes it possible to present the material visually, thus enhancing comprehension.

In primary education, the use of modern teaching technologies in presenting ethnopedagogical samples is a key tool in refreshing the pedagogical process and making it more effective. It plays an important role in teaching students about the nation's way of life, creative culture, and rich history.

Using multimedia, interactive technologies, and online resources to teach national culture not only deepens students' knowledge but also helps shape a younger generation that is loyal to national values and respectful of culture. At the same time, the use of modern technologies in teaching ethnopedagogical elements contributes to

increasing students' interest, fostering creative thinking, and developing independent learning skills.
