THE IMPORTANCE OF INFORMATION TECHNOLOGY IN LEARNING A FOREIGN LANGUAGE

Jo'rayeva Zuhra Kamoliddin qizi
Chirchik State Pedagogical University

Abstract: the article talks about the importance of information technology in learning the Shet
language.

Key words: Foreign language, game, innovative technology, technological tools, methods,
methods.

With the rapid development of information and communication technologies, which is one of the
unique features of our time, special attention is being paid to using its possibilities, to fully approach the
educational process and to organize it. The 21st century is the age of high technologies, and our modern
youth are taking steps not only in accordance with the spirit of the time, but also in accordance with the
progress in the electronic world. For this reason, a different approach to the process of teaching the young
generation is required. The role of the teacher in the lessons is also changing. The teacher now acts mainly
as a guide. It is time for teachers who aim to keep pace with the times to be ready to enliven any part of
the lesson through ICT.
In the Decision of the President of the Republic of Uzbekistan in 2022 "On measures to further
improve the system of learning foreign languages" "The way to introduce advanced methods of teaching
using modern pedagogical and information and communication technologies with, the education of the
growing young generation in foreign languages, the fundamental improvement of the system of training

specialists who can speak these languages fluently and, on the basis of this, the achievements of world

development and their extensive use of world information resources, the development of international

cooperation and communication - creation of conditions and opportunities" and the need to implement a

number of important tasks for this. This document indicates that from the 2022-2030 school year, foreign

languages will be taught in the first grades of general secondary schools, then in the form of games, and

then the main ones. teaching using ICT tools is defined as an educational subject. In accordance with this

important decision, today, in particular, foreign language lessons were looked at more deeply. In order to

protect the country's honor on the world stage, our youth must first be able to compete with their foreign

peers. conducted in English, the international business language.

In fact, the role of modern pedagogical technologies and information and communication tools in

improving the quality and effectiveness of education, in the purposeful organization of game-based

lessons that interest students is very large. is becoming an integral part of the educational process. In order

to teach young people English through a computer, first of all, the teacher himself must be able to use

computer technologies at a professional level. it also includes the ability to organize new educational

programs based on it. In order to become a pedagogue of this level, every foreign language teacher needs

to work more on himself in the field of modern technologies. Computer-aided English language teaching

has several advantages over traditional teaching methods. First of all, computer-based English language

learners have four areas of language (speaking, listening, writing and reading). will be able to test their

skills. Currently, this is possible with the help of advanced programs. It is only necessary to be able to

properly direct the student to this method of education.

97

In addition, it has been proven that every rule, every word, every concept unit taught in the teaching

of foreign languages with the help of a computer is better stored in the student's memory. the ability to

deliver in video form makes computer-based foreign language teaching one of the most effective methods.

That's why I want to use the computer's rich capabilities to teach English to 5th grade students. Basically,

it is appropriate to use Word and Power Point programs to explain current topics. Because I think that

students will understand much easier if the topic is explained using table views through the Word program.

In Power Point, students can be more attracted to the topic by showing these topics in audio, picture and

video formats.

As stated by our President I. Karimov in his works entitled "High Spirituality-Yengilmaskuch": "If

you want to glorify Uzbekistan to the world, glorify its ancient history and bright future, if you want to

keep it forever in the memory of generations, first of all We must educate great writers, great poets, and

great artists". Therefore, learning a foreign language is a requirement of the current era, and developing

new methods of language learning for the young generation based on the "National Personnel Training

Program" , recommendation for the study process is one of the urgent issues facing scientists and

specialists. In order for our talented young people to become mature specialists in their fields of interest,

first of all, it is necessary for them to have a perfect knowledge of any foreign language, including English.

Therefore, introducing technologies and ensuring that teaching methods meet the requirements of

the times are the main tasks of pedagogues-scientists that cannot be delayed. At a time when the economic,

political, cultural and educational relations of our country with the countries of the world are

strengthening, the interest of our youth in the life, culture, customs, and language of foreign countries is

increasing. In the development of these relations, the role of foreign languages, especially English, is

incomparable.
