**Abstract:** This study explores effective strategies for teaching English in higher education institutions. Employing a mixed-methods approach, we investigate the impact of innovative teaching methods on student engagement and language proficiency. Findings suggest that a student-centered approach and technology integration enhance learning outcomes. The study contributes to the ongoing discourse on English language instruction in higher education, offering insights for educators and policymakers. This scientific article explores contemporary pedagogical strategies and innovative approaches to teaching English in higher education institutions. The study employs a mixed-methods research design, integrating surveys, interviews, and student performance assessments. Results indicate the efficacy of student-centered methodologies and technology integration in fostering language proficiency and engagement. The findings contribute to the ongoing discourse on effective English language instruction, offering insights for educators, administrators, and policymakers.

### **Keywords:**

English language teaching, higher education, pedagogical strategies, student-centered learning, technology integration, language proficiency, innovative approaches. pedagogical strategies.

**Introduction:** English language instruction in higher education plays a crucial role in shaping students' communication skills and academic success. As the global demand for English proficiency rises, educators are challenged to adopt effective teaching methods. This study aims to explore various strategies employed in teaching English in higher education institutions and assess their impact on student outcomes. The research addresses the need for innovative approaches to meet the diverse linguistic needs of students and enhance their language proficiency.

### **Methods:**

To achieve our research objectives, a mixed-methods approach was employed. The study involved a survey of English instructors in higher education institutions, collecting quantitative data on teaching methods and qualitative insights through interviews. Additionally, student performance and engagement were assessed through pre- and post-intervention evaluations, allowing for a comprehensive analysis of the effectiveness of different teaching strategies.

**Results and Analysis:**

Quantitative analysis revealed a positive correlation between the adoption of student-centered teaching methods and improved language proficiency. The survey data highlighted the popularity of technology integration in English classrooms, with students showing increased engagement in language learning activities. Qualitative insights from interviews underscored the importance of creating a supportive and interactive learning environment. Student evaluations demonstrated statistically significant improvements in language skills following the implementation of innovative teaching strategies.

**Summary:**

This study sheds light on effective strategies for teaching English in higher education, emphasizing the importance of student-centered approaches and technology integration. The findings have implications for educators seeking to enhance language proficiency and engagement in their classrooms. As institutions continue to diversify, adapting teaching methods to meet the linguistic needs of students becomes imperative for fostering academic success.
